SOFTWARE ENGINEERING

LAB 2

Agile Backlog Creation & Sprint Simulation in Jira

Project Title

Peer-to-Peer Carpooling Expense Splitter

Name	Dhruv Purushotham
SRN	PES1UG24CS154
Course	Software Engineering

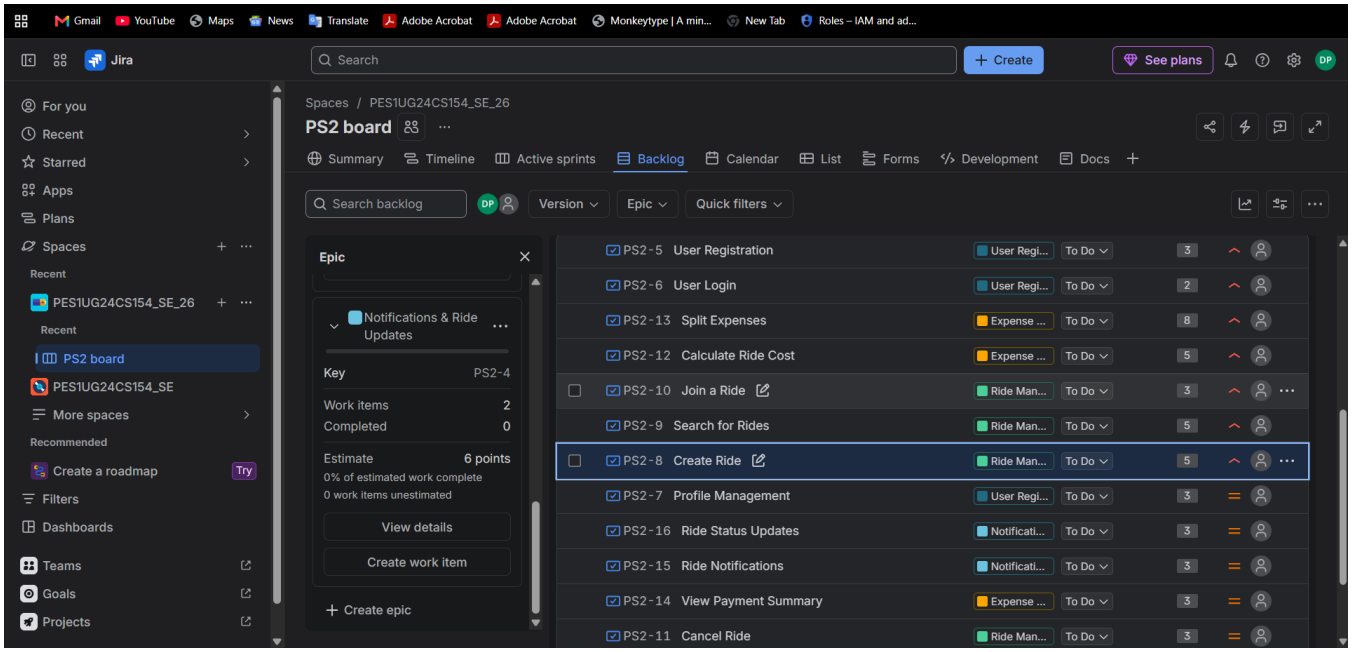

Jira Board: PS2 board

1. Lab Objective

The objective of this lab is to convert functional requirements into Agile backlog items, organize and prioritize the backlog, estimate work using story points, simulate Scrum sprints in Jira, and analyze sprint progress using the Burndown Chart.

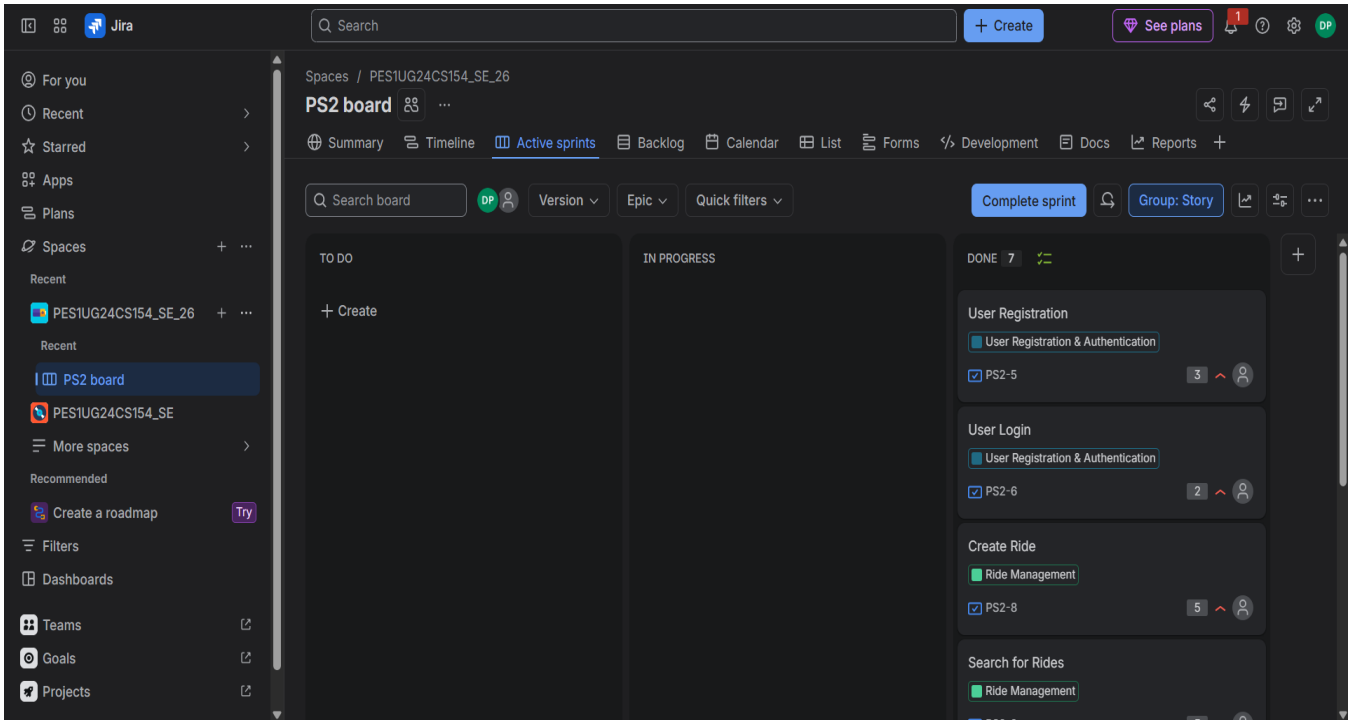

2. Jira Backlog

Backlog showing the project epics, user stories, priorities and story points.

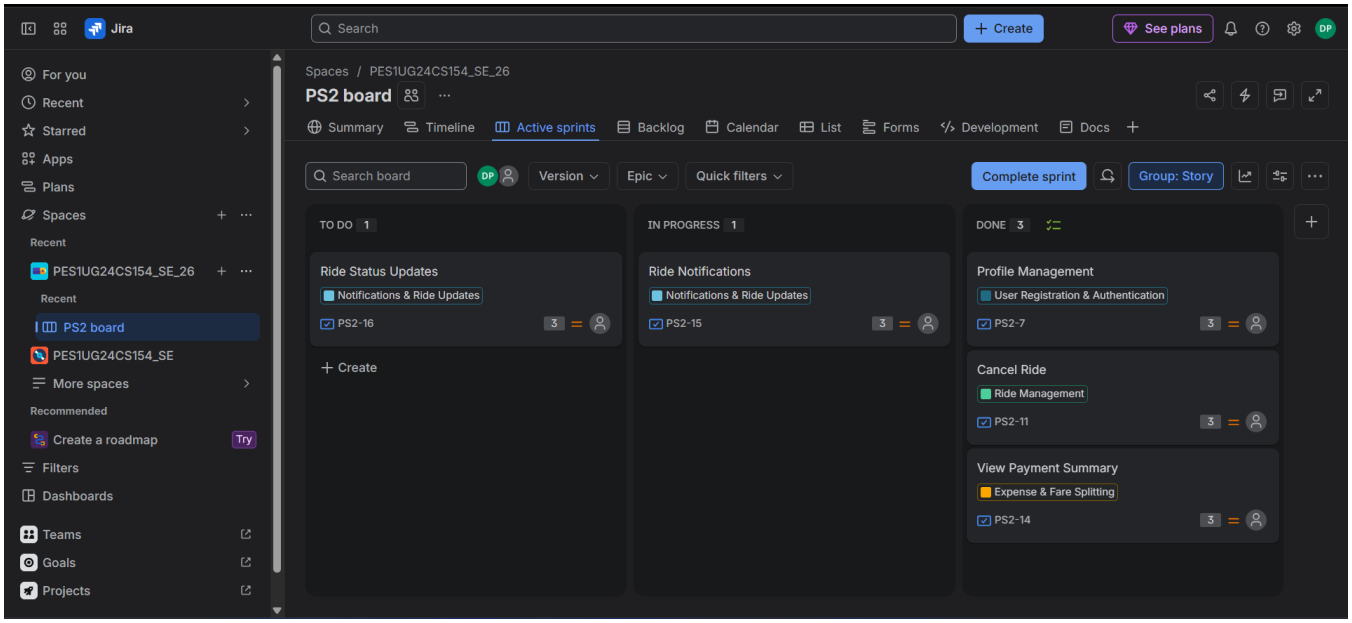

3. Sprint 1 – Active Sprint

Active Sprint board showing work distributed across To Do, In Progress and Done.

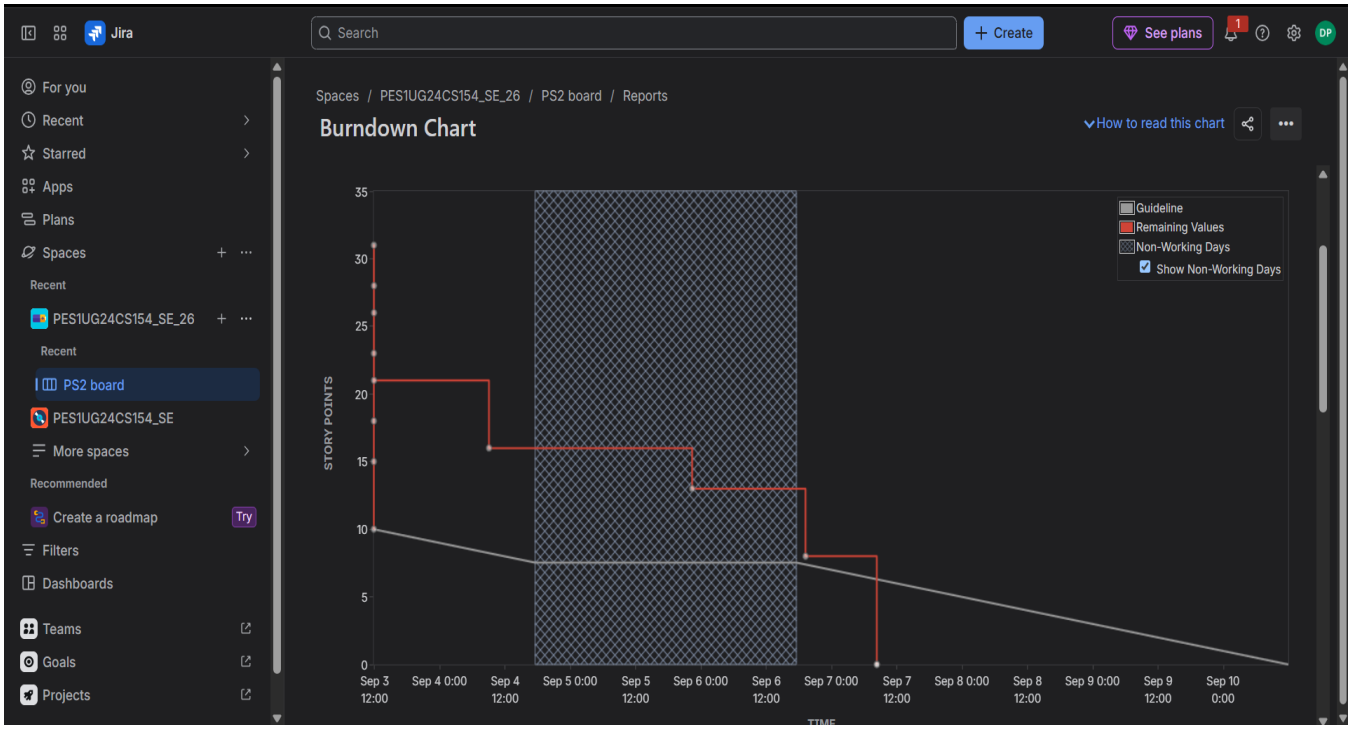

4. Sprint 2 – Remaining Work

Sprint 2 board showing the remaining supporting stories and their progress.

5. Burndown Chart

Jira Burndown Chart showing story-point progress over the sprint.

6. Reflection

1. Did your estimations reflect the actual effort?

The estimations generally reflected the expected effort. Smaller stories such as User Login received fewer points, while more complex stories such as Expense Splitting received higher points because of additional logic and uncertainty.

2. Was your backlog well-prioritized?

Yes. Core functionality such as registration, login, ride creation, ride searching, joining rides, and expense calculation was given high priority. Supporting functionality was assigned medium priority.

3. How did your simulated sprint align with your plan?

The simulated sprint aligned with the plan by selecting the high-priority core stories for Sprint 1 and moving the remaining supporting stories to Sprint 2. The To Do → In Progress → Done workflow represented incremental Scrum progress.

4. What insights did the Burndown Chart give about your team's capacity?

The Burndown Chart showed that the Sprint 1 workload started at 31 story points and decreased as stories were completed. The chart provided a visual indication of sprint progress and showed that the planned workload was completed by the end of the sprint.
